

What Should I Ask My Child's Health Care Professional?

These are some questions to get you started. Feel free to add your own as you think of them. In the space provided, write in the answer that your child's health care professional supplies.

What are my child's asthma treatment goals?

Is my child using a rescue inhaler too often?

What kind of medicines should my child have?

How often should we review my child's Asthma Action Plan with you?
